

(After reading following, see video at end of document titled, "Separation of Church & State?", and also at end of document see video titled, "Was America Founded on Christian Principles?")

Darwin's evolution is anti-Judeo Christian because it reduces Hebrew history recorded in the Old Testament Holy Scriptures into a mere myth, or worse, Jewish-fairy tales.

GLOBAL CONSCIOUSNESS SHIFT

SOCIAL DARWINISM IN SCHOOL A HUMAN IDENTITY CRISIS

"Our survival as a species depends on whether or not we begin to recognize our Devine humanity"

[hominid>n. A primate of the family Hominidae, which includes orangutans, gorillas, chimpanzees, and modern humans, and their extinct relatives.]

The provocative article "***Against School***" by John Taylor Gatto contains a very interesting point. His view on "How public education cripples our kids, and why" parallels statistical data on America's failing educational system. According to Norman Mailler's "***One Idea***" The U.S. spends more money per student and ranks 21st lowest of 24 industrial nations for scholastic and academic achievement. Obviously, something is amiss with this picture. Evolution propoganda is a multi-billion dollar school curriculum industry. Gatto's diagnostic analysis of our school's crippling effect on our students hits the nail on the head. Number five, "the selective function" referring to Darwin's theory of "natural selection" and "survival of the fittest" or richest philosophy, is the social basis and foundational principal on which our educational and economic system is erected. 90% of all students graduating from the public educational system evolve into hard-core atheists according to studies done by the Federal Bureau of Investigations. A defined connection between psycho killers and evolution education reveals motives between hard-core criminals and crime.

Growing up in Communist Soviet socialist occupied Czechoslovakia, Darwin's struggle for survival was fiercely taught as a new state religion. A belief system so pervasive, no one dared to question it and worse to test it. Sadly, in a state of passive grace the people of this severely brutalized country relinquished

their own true genius, “Gregor Mendel” who discovered hereditary transmission of dominant and recessive genetic traits formed the bases for DNA replication, cell division, sexual reproduction and species perpetuation. Mendel unraveled these various links connecting generations of life. His alarming discoveries were not published, and cleverly concealed from the general public. Mendel’s scientific point of view was rejected because it did not fit into the up and coming British Empire’s new world order - global agenda. Designed to deceive, Darwin’s pre-historic hyperbole masquerades as history in order to conceal recorded history. The Judeo Christian ethic is based on Biblical history. The Old and the New Testament represents a dichotomy of Judeo Christian origins at the same time one, but now fulfilled!!

At the onset of the industrial revolution, American Civil War and ensuing Indian genocide, Hawaii’s occupation and an additional hundred and sixty other occupied nations, Darwin’s publishing of, “On the Origin of Species by Means of Natural Selection; or, the Preservation of Favored Races in the Struggle for Life” in 1859 was what the English industrialist machinery set forth to set a new paradigm for mankind. “Natural Selection and Survival of the Fittest” runaway competition and ruthless exploitation would become the new religion for the “Homo-Sapiens Hominid Primate” rat race. The irresistible trap was set. Nearly all the countries of the world would be stripped of their natural resources, traditional way of life, language, and inherent ancestral consciousness. English would become the global language, and England the consciousness center of the world. Time begins and ends in Greenwich, England.

Herbert Spencer hijacked Darwinism to inject his own brand of poison to drug the world with his insidious phrase “survival of the fittest”. Apparently we depend on “survival of the fittest kill or be killed belief system,” where you must fight to survive. As a result our society continues to rape the earth, each other, destroying everything in our path, and ultimately ourselves. Incidentally, the last one hundred and fifty years, have been the most destructive environmentally in recorded history. Does Darwin’s struggle play the invisible hand that sets the price of a free market? The elusive link between Darwinism, Marxism vs. Capitalism is not clear, and has yet to be fully recognized. Will Marxist Darwinism ultimately dominate the political environment of the world? A deep-seated impairment of our children’s cognitive sensibilities has evolved into a false sense of

consciousness and reality. We are no longer rational human beings, unable to discern fact from fiction. T.V. shows tell a vision of pre-historic science fiction movies, nature documentaries, cartoons and specials programming evolution consciousness.

We spend more money per student and come near dead last in scholastic achievement. If the U.S. is to retain its place in the world, it must learn to be less frivolous and much more efficient in how we teach our vulnerable and often gullible students. Art and music should be mandatory to balance the left and right hemispheres of our minds consciousness. Careful observation of a student's strong points and guidance towards a career that closely matches the student, their capabilities and talent; teaching the student exactly what he or she must know to be productive in their field and eliminating the non-essentials. Also, Darwin should be replaced with Mendel as the true father of modern biology, so that we could *recognize* what the latest DNA-RNA discoveries are really telling us. During a historic speech at the White House in 1999, marking the end of phase 1 of the Human Genome Project, President Bill Clinton announced "mapping out the human DNA is like studying the language of God". These are not the words of a religious man, Clinton is said to have the I.Q. of a genius. DNA data can restore our **sense of personal and collective identity**. United States public school curriculum presents a one sided view which directs a predetermined outcome! Darwinian ideology.

Today's pseudo-scientific curriculum is a lot like GMO school lunch, bologna, Kraft-American cheese, Hellman's mayo and Wonder bread, simply unhealthy and indigestible. Evolution's curse is the lie we live in as all of creation around us dies in response to our artificial superimposition on nature. As a result we have become disconnected from reality now trapped in evolution's virtual door of false perception. Creation gets a flat out F- while evolution gets an automatic A+ you must adapt or die; all this programming in violation of free speech in good ole USA. EVOLUTION has silenced objectivity and critical thinking, manifesting a duplicate reality shift. Evolution is a complete counterclockwise distortion of consciousness, time and space a strange fiction turning a blind eye to the space/time NOW continuum. Have we reached a point of no return, this is not a rehearsal on a simulated pre-historic stage of evolution where time travels counterclockwise. The clockwise trajectory of time always travels forward in the

here and now because biology, physics as well as history keeps repeating itself. So if life is like a box of chocolates when you never know what you're going to get, why does a woman giving birth be absolutely certain she is going to have a human baby. We can be sure that some things will never change. Evolution's far reaching consequences are blowing in the wind to decimate future generations who will inherit Darwin's Mandela effect. A global consciousness shift is when a large group of people all believe and remember an event that never happened. A fabricated past event should never be underestimated so is the false narrative of pre-history. Darwin's theory of evolution is responsible for cognitive dissonance an altered state of consciousness, shifting us into a Mandela effect. Can Mendel's prophetic observations put us back on the right track? Time will tell.

Deoxyribo-Nucleic-Acid consists of two extremely long (several million miles long when stretched out) chains of nucleotides twisted into a double-helix spiral joined together by hydrogen bonds. The DNA-RNA is a super-microscopic self-replicating molecule containing trillions of bits of information in consequential formation and orderly transit for continuous duplication of itself. Hundreds, perhaps thousands of high-tech super-computers all working in unison is required to store, map, and analyze a mere two percent, of the information program stored inside the microscopic DNA. This tiny, yet vast self-replicating electro-chemical machine reproduces itself over and over again throughout one's lifetime. It is estimated that one-hundred trillion DNA-RNA molecules make up the human body. Eventual breakdown, shrinking chromosomes, and "mutations" of the DNA code leads to disease and death. A single glitch in the programming of the DNA code can become fatal. At the moment of birth a human infant begins to lose a vital isolated nucleic acid, within 24 hours this potential for eternal life will be gone. The self-replicating DNA had the capacity to live forever. All mammals share the same nucleic-acid compound the building block of protein, which forms the mass density of the DNA, an estimated 98%, it is within the remaining 2% information program that distinguishes us as a species and makes us different from other species. The DNA contains and transmits information on a continual basis, the body you had when you were a child has been completely renewed by the self-replicating process of the DNA. It was widely believed and accepted that complete bodily cellular renewal takes about seven years, but this timeline is irrelevant because a child's DNA replicates much faster than an older persons

sluggish DNA regeneration. We also now know that there is no junk or dark matter in the DNA as previously published and believed.

Darwin assumed that mutation of cells was the vehicle for the transmutation of species from primate to man when in actuality the uncontrolled mutation of cells forms cancer and a host of disabling infirmities. Nature's laboratory shows us repeatedly that all living organisms reproduce after their own kind and naturally adapt to changes in the immediate environment. We adapt all the time, it is part of our built in system of homeostasis. The discovery of genes with their dominant and recessive traits, chromosomes, and DNA code confirm this natural fact. Gregor Mendel's discovery of dominant and recessive genetic traits was conveniently fuzzed over by the catchy but vague terms of adaptation and natural selection. Darwin's assumptions have been proven erroneous by modern technology and Mendel has been confirmed to be 100% accurate. The monk holds the key to the genetic code of life not the monkey's uncle. Our generation has discovered the significant implication of Mendel's research through the recent mapping out of the DNA's life-code. Mendel continues to check Darwin. Apparently there is a grand design in nature; human minds cannot replicate for example, a seed that grows into a mighty tree. Does nature alone fit such potential, power, complexity into a tiny seed? Is it possible for scientific materialism to answer all our questions and inquiries? Can modern science survive a sudden attack of conscience? According to the International Code of Zoological Nomenclature classifies human beings as homo sapien's sapien's, granting special status to humans as a taxonomic rank for which no subspecies exist, nor even can ever exist.

Belief systems are set in place by those who get published and publicized. The Soviets used Darwinism as a platform for their political ideology to justify and enforce an atheist based society. Basically religion was outlawed. Marx wrote that religion is the opiate of the people as a result Darwinism evolved into a belief system that replaced the belief system of religion. Religion supposes faith in YHWH, Darwinism makes a Creator obsolete. Darwinism supposes that all living plants and creatures "evolved" or trans-mutated from pre-historic creatures by a process of adaptation and natural selection. Adaptation, natural selection and survival of the fittest are quite evident in nature, all living things possess an inherent ability to adapt to new environments imposed upon them. Yes the

strong and or aggressive usually survive over the weak and passive so they get to reproduce more often but this has nothing to do with biological evolution or transmutation into another species, because it is comparing apples with oranges. What we do not obviously see in nature is the ludicrous assumption that distinct organisms actually mutate into another species. As far as I can see, all living organisms reproduce after their own kind and are static to their own species in reproduction. There are thousands of different types of dogs for example and they can all reproduce with each other, it is also widely accepted that all dogs are related to the wolf. Man's ingenious manipulation of dominant and recessive genetic traits has created unlikely canine cousins as Chihuahuas, poodles, and beagles out of wolves.

The Moravian/Austrian scientist Gregor Mendel was taking the obvious and applying it to scientific experiments, he manipulated and crossbred plants to adapt to new environments and then he would revert them to their original condition by a selective process of dominant and recessive genetic traits. Mendel confirmed that organisms possess their own intrinsic DNA program unique to one's own nature. Coconut palms produce coconuts, cats reproduce cats, humans beget humans, chimpanzees are still chimpanzees and dogs produce dogs, a dog is a dog is a dog.

In reality the present is always the key to the past and unfolding future. Nature is the laboratory; we are the spectators in a living experiment that repeats itself over and over. Humans reproduce humans, apes reproduce apes. Mutations reproduce cancer and disease, mutations do not trans-mutate a species into another species. With all the billions of dollars spent on cancer research we still have not connected the dots between cancer and the theory of evolution. The evolution revolution has exchanged the Creator for cancer. Genesis the book of origins for "Origin of the Species": The unfolding present for the imagined pre-historic past. The upright walking hominid now lives in its make-believe past unable to comprehend the present. No longer a human with a soul and guiding moral code or divine conscience: Ruled by the law of the jungle the mental mutant becomes Kong, King of the concrete jungle. Now at the peak of his empire there is nowhere to go but rapidly descend towards the filthy city streets of ravenous mass consumption.

Not recognizing what he sees as a sacred gift to be nurtured and shared, nature becomes a plaything of his imagination: Professing prophets forever reinventing an imagined pre-historic past for his oblivious audience and unsuspecting students. The imagined past that never happened shapes the human mind in the present. The present becomes no longer recognizable because of the imagined past that shapes the unfolding future. In present reality humans have always been humans and will always be human, but this is not what we believe. We have come to believe we are homo-sapiens primates “technically speaking”, otherwise we wouldn’t be teaching generic Darwinism to ourselves in school, universities and media. We no longer make sound judgments in scientific discoveries, the present no longer matters when under the spell of an imagined past. The imagined past becomes the guiding principal for the interpretation of scientific discoveries and observations in the present reality. Darwin gained wealth from his theory of evolution and set in to motion a global multi-trillion dollar industry.

Caught between a rock and a hard place unable to extricate himself from his meticulous irony, neither ape or man a mental mutant lost in hopeless confusion and chaos, unable to adapt and cope with his make-believe environment. No longer living in harmony with nature he finds himself divorced from nature. No longer a thing of beauty that sustains him, but something to be manipulated, exploited and sold for the love of money. Life, love, spirit, marriage, commitment, children, family, intentional community, sustainability and stewardship of the land are no longer sacred nor cherished. Disparity between the super-rich and dauntingly poor draws a yawning chasm echoing with fainting sounds for justice, that never seems to come.

As a painting requires an artist, so is nature a work of art. This reflection of design, perpetual perfection and genetic reproduction has grown dim, barely recognizable to the mutant eye. The modern age of enlightenment has cast the mutant back into the darkest of all ages. Fossil footprints trample the earth on a continual basis, we know it’s wrong, but we just can’t stop. Spewing gas into life giving waters and the air we must breathe with reckless abandon, racing towards a precipice of no return, have we learned nothing? Competition is no match for co-operation, if we are to survive on this most beautiful life giving sphere in the universe, our living Earth in peril. Darwinian economics far reaching effect is

destroying our environment at such an alarming rate it threatens the survival of our species and all life on earth. Extinction of entire species is on the rise, environmental red flags up in flames. Everyone, start your engines.

Mankind's treacherous treatment of his environment and gross misunderstanding of nature is made evident by his poetic faith in evolutions survival of the fittest or in man's case survival of the richest at any cost philosophy. Man no longer recognizes his inherent humanity, on the contrary, he views himself as a homo-sapiens hominid a species of bipedal primates; ranked in the mammalian order of apes, monkeys and lemurs who have subconsciously succumbed to the law of the jungle, kill or be killed. With this in mind the modern homo-sapiens primate is morally obligated to do whatever it takes to win, to get the prize, to be rich, to survive and thrive at the price of others and the environment. Our public school system pushes kids to compete on all levels, academically, athletically and sexually. This is not the best way to build a society based on compassion and cooperation within a shared environment's fragile Eco-system.

Fueled by intense competition, modern progress encroaches upon nature in an effort to exploit its resources. Transforming life giving forests into tooth picks, toilet paper-towels, books, boxes and 2x4's, the upright bi-pedal hominid walks proudly through the concrete jungle he has manufactured for himself. Armed to the teeth, the walking ape has become the world's most dangerous animal, able to start world wars, genetically modify organisms, or worse, to obliterate all life on earth. The metamorphosis of humanity into homo-sapiens has transformed the earth into a "Planet of the Apes". Mankind is acting out what he believes himself to be. No longer swinging through the trees the walking ape flies through the air, blows rockets into outer space and drives around in circles inside chariots of hell-fire. In his relentless quest for wealth and power, the driving hominid is polluting and consuming his most precious and vital resource, the very air he breathes. Because air is free.

The combustion engine consumes the atmosphere faster than nature's ability to reproduce oxygen. We are consuming our atmosphere, vital to our survival, for money. Survival of the frichest? Think again! Planetary survival hangs in the balance of our atmosphere, and more importantly what *we* choose to do

about it. At the same time of unprecedented consumption of our atmosphere, we are killing ocean plankton with pollution, and defoliating the continents of its forests to build bigger cities, because it's profitable to do so. Massive global reforestation is the only thing we can do to stop and reverse global climate change. The money and energy we spend on space exploration could easily be enough to save planet earth. When dealing with global climate change we must be prepared to set our priorities straight, reforestation and afforestation on a global scale. Ironically, it is not profitable to grow forests, because it takes timber longer to mature than one human lifetime, prohibiting short term profit for the investor. Planting trees is an investment into the future. The logging industry abuses capitalism as a rogue force to achieve wealth, power and dominance at the expense of our global Eco-Sphere. Dealing with global climate change should be our number one priority because global warming is a threat to economic stability and global peace. Time is of the essence, we must act now, by planting billions of Eco-seeds and seedlings to replace the vital forest of the earth. Desertification must be stopped in its tracks for the sake of future generations. First came man the deserts followed, stop this hokie-pokie it is time to turn ourselves around. Planting billions of eco-seeds from helicopters can accomplish this necessary mission to save Earth from atmospheric implosion.

Nature's oxygen production is at an all-time low. NASA's atmospheric observations have noticed a significant decrease in the volume of our atmosphere since observations began in the fifties. Apparently the mutant humanoid has found himself precariously out on a limb suspended by a handmade life rope tangled about his neck. Whatever the outcome, I remain optimistic because I believe in the resilience of nature and inherent goodness of humanity. And this is it; humanity vs. homo-sapiens primate consciousness, will we continue to allow ourselves to be guided by Divine-consciousness, or the law of the jungle, and survival of the fittest mentality? This is the hard question we are faced with. Yes, we possess an earthly treasure, but what will we and the future generations do or don't do with it? The problem is that we are too modern; we need to take a look back and rediscover the arts of our grandmothers and great-grandfathers. Getting in touch with our genetic imprint we inherited from our ancestors, by doing as they did, planting and tending gardens, orchards and raising of animals to insure fertility and stability, sustainability for the intentional community. The

raising of your own food restores the way back to nature and Divine-consciousness.

Wandering through time and space, searching for identity and meaning, woe is man! What have we become? But hairless apes driving around in our artificial world? Unable to recognize and make peace with nature the naked ape dives deeper and deeper into a make-believe reality. A reality based on projected images of a demented man's imagination of the past, pre-history. Distortion of history warped wrinkles in time manifest unintended consequences for present and future consciousness. Traveling back in time delusional, pre-historical evolution thrusts the human mind into a divergent dimension, causing confusion and distortion of present day to day reality. With the imagination gone wild predetermined conceptualism becomes an altered state of consciousness. Pre-history vs. history are strangers on a cacophonous train... of thought, leading in opposing directions. Homo-sapiens hominid primate consciousness is obscuring mankind's vision of the greatest historical discovery ever made; the divine genetic imprint confirming our created humanity within the DNA.

However, the tide of time cannot be held back, this natural ebb and flow just goes on repeating itself over and over again. As nature unfolds before us it reveals a certain duplication inherent to all life, confirming the fact that all living organisms grow, heal and reproduce after their own kind. Knowing their place, apes of the jungle recognize creation, but the homo-sapiens does not. Homo-sapiens primates do not believe in the self-evident creation of YHWH, but instead; the "theory of evolution" as described by Charles Darwin. This one man's effect on human-consciousness has evolved into hominid consciousness. From being created in the image of his Creator, to evolving from a pre-historic hominid to a homo-sapiens primate: Upside down and inside out as we stand upon our heads gazing at the hour-glass of time imagined, homo-sapiens primates exchanged the self-evident truth for a bold faced lie.

Only 160 years have passed since the first publishing of 50,000 copies of Darwin's "Origin of Species," a short time span for this remarkable evolutionary leap of human consciousness. Evolution however is a mental condition only, because it does not exist in the DNA. The DNA's chief function is replication of itself, cell division and sexual reproduction insuring the perpetuation of species.

No matter how much objective evidence is presented to the conditioned homo-sapiens primate, he obstinately refuses to acknowledge the obvious present day reality, replication of the DNA coupled with reproduction and perpetuation of species. Yreka! YHWH is alive after all, and Nietzsche is dead.

Vanquished horizons, evolution consciousness is a deeply seated state of mind; anchored denial of present day processes exchanged for the unobserved assumptions of the past. The homo-sapien's primate consciousness likens a child guerilla with a loaded machine gun. His loose cannon has managed to exploit vast amounts of natural resources, explode nuclear bombs and create a world at war. Willing to sacrifice anything and everything to be the richest animal; modern technology has proved a deadly combination in the hands of hominid consciousness. Grossly out of balance, the absurd has become an acceptable status quo agenda. The nature of Marxist Darwinian Capitalism evolved into a cold-war industry of creative destruction that engineers the likes of nuclear weapons shifting our global paradigm at terminal velocity which threatens our survival. Humanity has dodged the bullet of nuclear winter more than once. Dancing to a dangerous tune of Russian roulette one narcissist in power is all it took to bring down the Soviet. Pushing too many buttons and Chernobyl became a ghost town in a nuclear instant. Afraid of the monster they created the Soviet machine self-destructed bringing the iron clad wall down with it. Socio-Political Marxist Darwinism is a loaded gun in the wrong hands. In the path of a tidal wave and victim of shoddy design due to a tight budget, Fukushima continues to spill its radioactive poison into the Pacific killing everything in its path. Awareness is in the eyes of the beholder but induced consciousness chooses its own horse to ride. A loaded gun in one hand gets disarmed and put away in a safe place; in another hand that same gun can be used to kill. In the same sense DNA data can be perceived as Divine-consciousness or evolution consciousness. Will our society be better off without Divine-consciousness? Ask the people of Russia they experienced several generations of consciousness they should know. Can friendly complexity consciousness technologies we have created be our salvation from the technologies that devour us? Japanese men prefer to have sex with female robots than real women. A multibillion dollar industry, many women prefer vibrators to men; why buy a male chauvinist pig when all you need is a little plastic sausage. Thanx Sigmund Freud the inventor of modern psychology

and the vibrator, ironically psychologists rank number one on the suicide list. Sex without love is simply masturbation manifesting a feeling of emptiness and frustration.

Possessed victims of illusion hovering over Pandora's Box now wide open for all the evils of human life. Where everything is permissible, where there is no wrong, where there's only the "selective function's popular opinion." Cancerous tumors of Social Darwinism are out of control, beyond surgical removal or massive doses of radiation. Evolution's deadly disease terminated mankind's Divine-consciousness. Darwin was warned of the consequences his theory of evolution would have on humanity. On his deathbed Charles Darwin recanted everything and admitted he was wrong about the theory of evolution, but it was too late. The cancer had spread globally. Unprecedented in all of history, the massive publishing of "Origin of Species" became the world's best seller, inflicting its hypnotic trance. Darwinism affected the human course of history and altered the advancement of human knowledge. Tesla technology misappropriated for military application and sabotaged by inferior technology led by Edison, for example; genetically modified organisms are a direct result of evolution consciousness is yet another example; and another, the extensive endangered-species list with us humans at the top. Darwin's lit fuse has blown our minds, out of the blue and into the black, twilight zoned; is their hope of coming back? Aimlessness of science shuts the doors of perception to Divine-consciousness. An open insult to Judeo Christianity and people of faith, the Darwinian fish with legs is dead in the water and floats belly up. Modern man's infatuation with freaks and zombies is a reflection of his inner turmoil. Mankind was not meant to exist in two divergent time zones, because it is too easy to forget where reality starts and where it leaves off. And the cacophonous train leading nowhere just keeps on rollin. Pre-history's oxy-moron contradicts recorded history. But, awareness is to be present in the here and now.

Imperceptible, hardly perceivable opium induced imagination of a pre-historic past brought forth and forged a way for pseudo-scientific consciousness. It is unimaginable to comprehend that a 5th generation-inbred, physically disfigured and mentally deranged drug addict would become the unlikely father of modern biology. We are what we think we are what we have become in our minds, and "one" with the demented mind of Charles Darwin. This deeply

troubled man with his own 6th generation inbred children, ostracized by his neighbors and local community, exacted his bitter revenge on YHWH and His children by making the Father obsolete with the theory of evolution. His ultimate act of revenge against the Creator he hated and people he despised all summed up in his "***Origin of Species***". Who is the most dangerous pseudo-scientific social terrorist of all time? Who was this crooked faced inbred that ripped off humanities identity and turned us into unsuspecting homo-sapiens primates? Sub-versive, sub-human, sub-consciousness is public enemy #1.

Darwin's unquenchable thirst for revenge should not be underestimated. Humanity has forsaken its soul, the mutant homo-sapiens primate after all evolved from scum in a pre-historic pond. Death is the end of life, forever extinguished and relinquished of life. Faith in eternity lost, no more eternal life. This is the spiritual culmination of Darwinian consciousness. It boldly defies common sense, logic, and scientific principles of nature. Yes, this bold-faced lie has deceived many but not all. The question is, who are you? What is your identity? Are you a human *or* homo-sapiens primate? You have a conscience, reasoning skills but what is your point of view? It is the point of view one has been taught and brought up with that ultimately determines ones perspective. Just like a drug addict craving for more, Darwin's pusher is the fix we crave.

We may believe we are created perfectly complete in the image of the Creator, or that we gradually evolved from a primate, one or the other, there is no middle ground. We become what we believe ourselves to be. Consequently, the shift from human to homo-sapiens primate consciousness has become a negatively polarized social issue suspended in a cloud of fear and neglect. Personally I am not a religious sort of man, however I do recognize the value of YHWH consciousness and spirit filled life. Darwin, deeply religious, did not recognize YHWH consciousness in all of creation. Jesus Christ of Nazareth, the culmination of YHWH consciousness, scorned the religious. It was the Vatican, the Roman Catholic Church that silenced their champion, Gregor Mendel. A reformed modern day Moses, Darwin leads us out of the Promised Land and back to Egypt.

At this particular time in history humanity is faced with the mental transformation from the created to the evolved. Out with the old, in with the new, everything goes, tradition, religion, faith, morals, values, even love, and is

replaced with natural selection and survival of the richest consciousness. Anything goes to get rich, anything; money is the bottom line; it insures our survival as individuals. The pursuit of wealth becomes God. One god-less belief-system replacing YHWH's belief system. "The love of money is the root of all evil". But evolution consciousness does not comprehend the Word of YHWH. These are extremely polarized belief-systems. One system needs very long periods of time to achieve the complex systems we observe in our DNA, the world around us, and the universe. The other belief system does not require long periods of time to achieve our present reality because it was created complete and functioning along with the capacity of reproducing. This is the reality that exists because throughout recorded history we have observed the phenomena of repetitive genetic recycling repeating itself over and over again. It is the male who determines blood type and sexual gender in the offspring. Females often determine when genetically dominant physical characteristics such as eye and hair color. People of color are usually genetically dominant and light skinned people genetically recessive when generating an offspring; all of us are unique, we see and recognize an endless variety of people who all belong to a common ancestry making us brothers and sisters of the human family.

Alarming! The Human Genome Project is automatically identified "homo-sapiens" on the super-computers screens, so we are really interpreting DNA data as homo-sapiens when in fact it is screaming human. There is no evolution in the DNA. The DNA is programmed and calibrated to prohibit evolution from occurring. Breakdown of the DNA code results in cancer, mutations that kill is hardly an argument for evolution. Mutation's hopeful monster is sickness and death not transmutation into another species. Even Genetically Modified Organisms struggle to retain their own genetic structure, man-made evolution fails to - reproduce.

We never ever actually *observe* the forces of evolution occurring in the present, only as a mental picture of an imagined pre-historic past. Power of suggestion, pre-historic dinosaurs, and the image of the beast is deadlier than the beast. So powerful are the images imprinted in our minds we become blind to the obvious. Nature's sheer complexity, design and beauty demands intelligence, order and artistry, a creative force identified as YHWH. Without Creator consciousness we cease to be co-creators, stewards of the garden, and become

self-centered consumers. As children of YHWH we are all created as equals, with inalienable rights, however evolution dictates something else “natural selection and survival of the fittest”. Evolution does not see us as equals but as competitors for resources and wealth. Evolution consciousness favors and measures a man or woman by his or her wealth. Darwinism exploits this profound struggle between the security of the collective and the autonomous independence of the individual. Yes, the unbridled pursuit of wealth insures our survival as individuals at the expense of our survival as a global collective. YHWH consciousness restores the foundation that defines our common ground, one ohana-family that sees each other in a new light, as diverse brothers and sisters of a noble human family. We are ancestral descendants from one family tree; we all share the same set of base primal genes we inherited from a common set of parents the first man and woman Adam and Eve. YHWH took dirt and made the first Adam breathed His divine breath into Adam to give him life, incredible as it is humans and dirt contain the same constituents. YHWH took a rib out of Adam to create the first Eve, interestingly enough modern genetics proves that the rib of all human parts is the ideal agent for cloning. A singularity in search of itself DNA research has unveiled the genetic interconnectedness of human-kind and unity of Spirit, Divine-consciousness presence synchronized in our DNA.

Our survival as a distinct species depends on whether or not we recognize our inherent humanity. Human kind is making historic discoveries about itself at the super-microscopic level, how will this valuable data be translated and delivered, how will the DNA be understood by the general public? What are we teaching our kids now in the 21st century? This is it, our hour of reckoning has come, who would have ever guessed that one angry mad-man could impair humanity’s ability to know and recognize himself in the face of the DNA. The genie has been let out of the bottle the mysterious encoded program of life revealed in a very tiny package. A dream comes true. Universe found in the micro-cosm.

Great places of learning are chiefly responsible for the global consciousness shift towards a black hole of no return. Darwinism is unshakeable and remains undaunted. Staunch disciples of Darwin continue their blasphemous outrage. So it seems that Darwin won himself a monopoly in the science department. Unwilling and unable to change their point of view the abrupt gravitational pull of evolution consciousness continues to take its toll upon unsuspecting students. The

inescapable urge to conform, being part of the crowd and fear of rejection puts the human reflex of self-preservation into a state of paralysis. “We are facing more than a struggle for scientific truth, intellectual well-being, prestige, and the material good things of life are at stake in the process of defining how we will perceive and what we will believe about the facts at hand. Therefore erroneous scientific directions are rather of great vitality and can darken for a long period of time the once flashed up light of truth. Or is it reputation concerned about how others will perceive us that gets in the way of our telling the emperor that he has no clothes on”. (Bartos-Kyriakidis p.18) Who dares to disturb the prevailing status quo and go where others fear to tread? “So Mr. Charles Darwin you continue to wield your axe above our heads” (R.E.M.). Today’s society fails to recognize the social and environmental cost of evolution consciousness. Modern hominid consciousness adapts and conforms in response to the “selective function.”

Marriage, an age old tradition between the binding of a man and woman, is no longer sacred. The ancient concept of family, obsolete: Fathers, mothers, children a thing of the past. What comes next? Machine sex, and genetically modified test tube baby clones born in factories grown for production instead of reproduction? Is this the evolving future for the eager homo-sapiens? Indeed this was the dim vision of Aldous Huxley’s book “The Brave New World” 1930. Even though Aldous dropped acid and hoarded cocaine his book of futuristic fiction is unfolding. His grandfather Thomas Huxley was known as “Darwin’s Bulldog”. Yes, this was the bully of a man who hustled Darwin’s “*Origin of Species*” to the masses. Undoubtedly Aldous was in on the inner know of esoteric future social consciousness.

It is much easier to control an animal with a programmed brain than a human being with a rational brain. You don’t want the flock to suspect that they are being led to the slaughterhouse. Are the British on our flags in our banks and in our brains? The all-encompassing Empire of Great Britain was world-wide it knew no boundaries. Great Britain drew the world’s geopolitical map with a sword. Who were these bloody bastards that invaded the islands of Hawaii, S. Pacific, New Zealand, New Guinea, Australia, Tasmania, Japan, China, Asia, India, Afghanistan, Pakistan, Middle East, Africa, Ireland, Scotland, Russian gold and crown jewels, Canada and America? There are many ways to control; the harvesting of consciousness is one of those ways. Darwin a patsy played his part

for the evolution revolution, vital for English influence to remain a dominant world power. The elitist's plot worked splendidly and the Brits grow rich. With all due respect and love to those good people of England I apologize, this is not meant to be offensive but to bring a blinding darkness into the light.

According to the author and historian J.R Tolkien, ancient folklore tells of the English language origins, tales of Viking sorceresses who invented the tongue for witchcraft, casting of spells, chants, poetry, and ultimately to conquer the world. Is evolution part of an English elitist plot to maintain influence and mind control of the world's masses? If so where is the proof? Well, what language is the world speaking anyway, is it not English? Are we not thinking in English a sorcerer's tongue? Is there a country on Earth that Great Britain has not invaded in one way or another? The embodiment of imperial Great British consciousness summed up in British Rock & Roll musicians who have the hot reputation of seducing anyone they want; rated as the most promiscuous people on earth the English rank number one. England, the proud sponsor of evolution consciousness is suffering its own delirious effect hands-on. Smothered in self-imposed spiritual anemia the poor Brits find solace in Harry Potter and witchcraft. What else do we have to offer? Good leadership? God Save the Queen!

Was it just chance that raised Darwin to international status while silencing Mendel? Or was it by design? These masters of chaos and confusion, do they have a hidden agenda? Is it being played out, a work in progress? A long time ago on the beautiful islands of Hawaii and before the British conquest of these Sandwich Isles as the English called them, human sacrifice was a common occurrence. Breaking kapu was punishable by death, when a commoner (kauwas) shadow accidentally cast upon an Alii (elite) kapu was broken this spelled death amongst numerous other harsh laws. Millions of innocent males were sacrificed to appease the anti-goddess Pele of the volcano. Now the beloved aunty-goddess Pele has evolved through modern (haoles) without the breath of the Holy Spirit to worship her as a way to belittle the male patriarch father figure who is a willing sacrifice for his neo-nazi overbearing feminist chauvinist female goddess counterpart.

The relentless association of Christianity with the exploitation and extermination of others is a convenient way to shift blame away from those without breath of the Spirit (haoles) rich elite who profit without conscience. The

English way is the world's way a leading charge for the evolution of the Great British Empire led by ruthless Lords and Bankster-speculators causing the demise of the American Indian, Indian Indian, Aborigines of the South Pacific, Africans, Chinese, Asians, Arabs of the Middle East, Hawaiians, Europeans and Russians all victims of the Great British Global Empire. Jesus Christ and his followers lived a life of service unto others, the master Servant taught his followers self-sacrifice and do unto others as you would have them do unto you. Love your neighbor as yourselves, love your enemy, sell everything you have and give it to the poor. Evil men who masquerade as Christians are children of Satan (Gadreel). Christian values dictate we are all created equal in the image of YHWH with the right to life, liberty and the pursuit of happiness. No genuine Christian has ever harmed anyone anywhere. Hawaiians were dying from sexually transmitted diseases by the hundreds of thousands, this is why hula was prohibited for a few seasons and the wearing of modest dresses (mumus) were worn to save the Hawaiian people from extinction, not to subdue their culture but to save it, a common misconception eagerly taught by atheist Darwinists worldwide. The British imported blood thirsty English murders, sentenced to life in prison, to exterminate all Australian Aborigines with the reward of freedom. Consequently, missionaries who made the life and death difference for the Aborigines' were blamed for the demise of the Australian Aboriginal culture.

Revolution is the root word of evolution; this particular word has evolved into many different meanings. This multiple usage for the word evolution confuses the literal meaning of the word when applied to the science of Biology. For example we can say that music is an evolutionary art form, because it always changes and expands, however this has nothing to do with biological evolution, but the mind sees this as an association because the word is the same. This multiple usage lends credence to the idea and belief of biological evolution. Oddly enough the only time we witness transformational events of a species is seen in movies and cartoons. Had Darwin known more about genetics he would have postulated that humans evolved from pigs because pig organs are widely used for transplants, ape parts always kill the patient, does that mean we evolved from pigs not hardly it would not be kosher.

Hardly a day goes by that we don't get buzzed with subliminal messages of evolution programing. Evolution has become one of the most frequently used

words in our vocabulary, central to the nervous system and psyche of modern society. Evolution is everywhere and nowhere. Did music really evolve or was it created by mankind, we could just as easily say music has developed throughout the ages, after all music is a product of human consciousness. But because we are led to believe that the incredibly complex human biological machine has evolved throughout the ages we are inclined to say that music has evolved as well. Evolution is hip, dig it.

It takes talent, work, intelligence and practice to create music, so in essence music is created. There are over 100 trillion bits of consequential information within a tiny fragment of our DNA, all in order and spontaneous communication with one another. This incredible self-replicating super-computer called the DNA holds the musical notes of life, able to overload hundreds of large super-computers created by mankind. We could say that modern technology has *evolved* in the last hundred years, but literally speaking computer technology is the product of *work*. It takes work, energy and intelligence to build a complex system. I'O is the name of the Creator, the source of life and aloha. People of ancient Hawaii'o recognized multiple levels of consciousness, unconsciousness, sub-consciousness, present consciousness, super-consciousness and Creator-Consciousness.

Many of our ancient ancestors were aware of the Great Spirit who created the visible out of the invisible. In tune with nature they recognized the work of Creation. Creation stories abound the world over, Kumulipo the Hawaiian Creation Chant articulates the continual reproduction of species. **Genesis** articulates Creation as a complete work in progress, all the first pairs of living creatures were created complete and ready to reproduce. The first creatures were not born or hatched; this answers the age old question, what came first the chicken or the egg? The chicken and the rooster with all their inherent faculties came first to produce and hatch a perfect egg. Every single tiny detail must be perfect and precise or the organism will not work. It takes a male and female to reproduce, this is not faith, this is visible observation written in word or memorized in a chant. Alarmingly both the Kumulipo Creation Chant and the book of **Genesis** have been modified and homogenized into the evolution myth. Evolution consciousness has replaced Creation consciousness; duplicit interpretation of key words has homogenized creation into the evolution myth.

“In the beginning YHWH created the heavens and the earth and the earth was formless and void”. (**Genesis 1:1**) “Formless and void” has been misinterpreted to mean chaos, to imply that all things were created or evolved out of chaos. Giving credence to the chaos theory which in turn gives credibility to a long term chain of events, evolution, give it enough time and anything can happen all things are possible. The “incredible power of myth” afloat in a bowl of Campbell’s alphabet soup, no matter how long you stir, the letters won’t form words. Beyond time and chance 100 trillion consequential micro-bits of genetic code squeezed into the microscopic DNA, is no myth, Joe.

According to the 1st and 2nd laws of thermodynamics all energy is recycled and complex systems wind down they don’t wind upwards, from order to disorder, from life to death. We don’t see before our eyes the appearance of higher level species, we only see entropy, degradation and extinction of species and nonviable mutations that fail to survive. Our bodies represent a storehouse of energy that will ultimately wind down die and are recycled into the ether of unknowing or eternal consciousness. So what is the point of this evolution-revolution? A harvest, to harness a human beings consciousness and capture the soul? Is this a form of spiritual cannibalism that robs human beings of their Divine-consciousness and spiritual manna?

A form of sorcery turning a positive into a negative? A magical trick? Doublespeak? Morphing creation into a myth and replacing it with evolution. The unobservable theory of evolution presented as de-facto science does not qualify scientific criteria. We have never witnessed anything but human babies birthing out of human women, humans have never ever witnessed the transmutation of any species yet we believe it because its pre-historic science. No one was there to witness and record pre-history. So what is science? Is it not knowledge gained through experience by the use of our senses? Do we not possess intuitive perception? An awareness of what is right and what is wrong? An all knowing - Divine- consciousness subtle presence.

What is this invisible sense? Unlike the senses of touch, smell, taste, sight, hearing and equilibrium, the seventh sense is a deeply innate quality of the human heart. This whispering sense of what is right or wrong; this awareness of one’s own existence; this consciousness; this subtle force inherent inside all of us

determines the character and compassion of the human soul. We cannot physically perceive or put our finger on conscience but we know it exists. Is then human form a fusion of physical and spiritual perfection, Divine Love? Spirits in a physical body; where does conscience come from anyway? Is it just belief, a belief system? Can the conscience be turned off? Re-programmed and re-booted? And how does Social Darwinism impact our perception of natural science? Of nature and our interpretation of nature?

Rugged Northwest Arizona, home to one of the world's greatest natural wonders, serpentine through the Kaibab Plateau at the southernmost edge of the Great Basin Desert. One mile deep the Grand Canyon is exposed by erosion, to reveal the geologic column bearing distinct horizontal lines of contact between geological strata layers, where no signs of erosion is observed. Those ageless layers of terra-firma cry out in glory beneath our feet, to reveal the mystery of forsaken history. Like the lines upon a page or pages in a book they lay one upon each other exposed by erosion, yet no erosion between them is found. Flesh and bones etched in stone apparently in no consequential order. Has it not occurred to the indoctrinated scientist that a simultaneous explosive ballistic-deposition of these >meta>morphic> vapor> phase> to rock> layers, were laid down before erosion had a chance to occur? Bowen's reaction series took place in the atmosphere not underground. "Distribution can only be achieved by ballistic transport above the atmosphere" (Wasson). "At the moment of explosion, extensive chemical change within an incandescent cloud in the state of a silicate aerosol and vaporous solution condensed at the appropriate point of cooling to form metamorphic rock layers." (Florenskyi and Dikkov) This explosive event 2450 B.C. which actually occurred and recorded as history in the book of **Genesis 7:11**, has been totally obscured by great modern myths of long and successive pre-historic time periods. "

It takes a keen eye to notice the saltwater line on the inner rim of the mountaintops surrounding the Great Basin Desert. According to Indian oral history this once vast inland saltwater sea ripped through the Kaibab Plateau during a great earthquake approximately 1200 years ago. Evidence of this is clear because the opposing sides of the Grand Canyon are displaced by a full 1000 vertical feet. Contrary to popular opinion both the deposition of the geologic column and its subsequent erosion actually occurred in remarkably short time

spans. “One needs to be wary of theories built upon assumptions that geological processes act slowly and accumulatively to give predictable results that may even be computerized by programming. They do nothing of a sort.” (King 215)

Clearly these arguments are not presented to our students on the grounds of separation of church and state, or simply because “The Word of YHWH” cannot be scientific. There are two sides to history and interpretations vary according to one’s perspective, prejudice and discrimination. If historical science is not allowed to be represented as having scientific and historic credibility in school, then our children will not receive the opportunity to make an educated choice between historical science and pre-historical science. “It is within the provision of the United States Constitution to present a unified, historic, and scientific account of Creation in the public institution of education. When the First Amendment was passed (dealing with the separation of church and state), it had two purposes. The first purpose was that there would be no established, ‘national’ church for the United States” (Schaeffer). This means that there would be no one particular ruling sect (evolution). The second purpose was that government would not impede or interfere with the free practice of religion. The misunderstanding of “separation of church and state” in the United States of America today has censored and silenced the Bible’s historic and scientific credibility. This is a total reversal from the original intent of the First Amendment. Democratic principles are grounded in compassion and goodwill towards all mankind, “is the theory of evolution a viable metaphor for an enduring Democratic Constitutional Republic?”

As children’s parents are we failing to offer and teach historical creation science because we have not been taught this frame of reference? Are priests and rabbis, preachers and teachers, scientists and entertainers not teaching historical science because they have not been taught the creation perspective? We must regain the academic freedom to represent historical science in public schools if we are to remain a free thinking society. It is imperative that we - develop critical thinking skills, weighing things out, examining and questioning information before we accept it as fact. We have allowed ourselves to be misled because of the mighty status quo. Discussing these opposing issues in public schools is the only way to reach a new resolution. The word “educate”, means to draw out the truth. Today’s schools are not teaching students how to think they

are teaching us what to think. Institutionalized evolution has become sacred; no one dares to challenge it. Truth? We make it up as we go. If we continue to go along with pre-history as the framework for our search for truth we will again ring the words of Shakespeare “life is a tale told by an idiot full of sound and fury, signifying nothing.” (2 Thessalonians 2: 9-12) – “The coming of the lawless one is according to the working of Satan, with all power, signs, lying wonders, and with all unrighteous deception among those who perish, because they did not receive the love of the truth, that they might be saved. And for this reason YHWH sends them a powerful delusion, so that they will believe the lie, that they all may be condemned who did not believe the truth that had pleasure in unrighteousness.”

Albert Einstein once said that “the important thing is not to stop questioning”. Einstein’s concealed genius was his ability to put himself into the shoes of YHWH-consciousness, then ask the right question. The question is not: What is science? The question is: What is science apart from history? Will we rise above and transcend pre-history to capture this fleeting moment of greatest discovery, recognition of Divine- consciousness in the DNA? If we don’t rise above the smoke and mirrors now, we will have sunk past a threshold of no return. If not now, when? It is about time we take back our humanity and build a society based on co-operation with one another and the environment, reinstating the way of our ancestors and reclaiming our Divine inheritance. As stated in the Declaration of Independence, “We hold these truths to be self-evident, that all men are created equal, that they are endowed by their CREATOR with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness”. Amen
